Dear Sirs:

I believe that Microsoft has been put through enough.  
As a daily computer user, I feel it is in this nation's best interest... and the best interest of the consumer... for Microsoft to receive this settlement and to finally end this travesty on our economy. It's time to get on with re-building our economy, especially through the technology and creativity that Microsoft has developed (and will, hopefully continue to develop).

Let's end the injustice of persecuting Microsoft.  
Let's begin the next generation of computer improvements.
